It was summer and the day was hot and sunny. The children wore shorts and T-shirts and they had hats because they didn't want to be too hot. They wanted to have a picnic, so Lucy brought cheese and tomato sandwiches, and William brought biscuits and a big bottle of water.

They walked for a long time. Then Lucy said, 'I'm tired and my feet hurt. Let's stop behind these big rocks and eat our picnic.' After they ate their food, they saw an orange and green lizard which was running round the rocks. 'What a beautiful lizard! Where is it going? Let's follow it!' William said.

They followed the lizard, but it ran very quickly over the sand and rocks and soon they couldn't find it. The children looked round. 'Where are we now?' Lucy asked. They were in a new place. They didn't know where they were! 'I'm thirsty,' said William. 'And we drank all our water!'

Lucy said, 'Well, I remember that hill. We're about two kilometres away from it.' 'OK,' said William. 'Look. There was a river here before, but now there is no water. But there might still be water below us.' They started kicking the sand and moving it with their hands. Soon they found some water and drank it. When their bottle was full again, they went home.

Максимальное количество баллов: 47 (Время выполнения 60-90)

Part 1 Listening (10 minutes)

You will hear the answers to the five questions below. Listen and match the names with the questions.

1	b	Ellie	a) How do your parents feel about mobile phones?
2	c	Simson	b) How much money do you spend on your phone per week?
3	e	Kate	c) Do you think text messaging is bad for spelling?
4	a	Ms Anderson	d) Does your school have rules about mobile phones?
5	c	Mr Harrison	e) What do your parents say about text messaging?

Part 2 Reading (20 minutes)

Task 1. The parts of the following text are all mixed up. Put them in the right order.

- Once the king showed a new portion of his stories to a well-known critic. The critic decided to tell the truth and said that the stories were bad and poor.
- When the critic was brought to the palace the king asked him about the stories again. But the critic said he would rather get back to prison.
- Of course people were afraid of criticizing the king so they had to lie. Everyone said the stories were extremely good, which was not at all true.
- An old king liked to write stories which he thought were very good and professional. He showed them to everyone and asked what those people thought.
- After some time the king thought he had been too cruel and decided to set the critic free. He sent his men to the prison and told them to bring the man to the palace.
- The king got very angry with him and ordered his men to take him to prison. So the critic was sent for telling the truth.

Task 2

Read about the people in texts 7-12. They all would like to learn something new. Match schools/courses A-G with the people whose interests they can satisfy. There is only one letter you do not need to use.

- Edwina works for a multinational company with branches in most European countries. She really needs to learn French and German, but she has very little spare time and thinks it could be difficult to find time.
- Damian got his job as soon as he left school. He never had the chance to go to university. He isn't very happy with his job, but he knows he can't get a better one without a degree. He might try a part-time degree course if it's not too demanding.
- Alice has a lot of time on her hands. She is a very creative person with a lot of imagination, which she really doesn't use very much right now. She already has a lot of hobbies, but she'd rather learn something new that would let her use her imagination.
- Paul doesn't work; he looks after the children while his wife goes to work. He would like to do something for himself, learn something new or take up a new hobby, but he needs to stay at home.
- Rhona is a school teacher. She teaches mathematics, but has always been interested in art and culture. She takes a great interest in the philosophy and civilization of the East. She may go to Vietnam next year.
- Philip finds his life boring. He works nine to five, but has no other interests and would like to find something to do in the evening, maybe enroll on a course to learn something new, but nothing too demanding.

Task 1

You are going to read a magazine article about some animals which appeared in a TV documentary. Seven sentences have been removed from the article. Choose from the sentences A-H the one which fits each gap (7-13). There is one extra sentence which you do not need to use.

Meerkats are animals which are about 30 cm tall and live in groups of 20 to 30. The ones we were looking for were filmed during a period of four years and starred in a TV documentary series. We wanted to see them for real.

So it's 5.30 am and we are in the middle of nowhere, waiting for the sun to burn off the remains of yesterday's storm clouds. Nearby, a large black bird lets rip his deafening, regular wake-up call. 7 BF And while our eyes are off the ball, a meerkat makes his appearance.

He pops his head out of the burrow where he has spent the night. 8 B Apparently satisfied, he stands upright. He is followed by a female and then some other adults.

We arrived in extreme heat yesterday afternoon with great expectations, but this soon turned to disappointment. 9 H Today, however, we are finally metres away from some of the world's most charismatic wild creatures. Here are the homes of 14 meerkat groups who are the real-life, wildlife stars of an award-winning TV series.

To our excitement, the adult meerkats are swiftly followed out of the burrow by four five-week-old pups. It's the summer breeding season so you would expect to see young. 10 G

Unbelievably comical and cute, the youngsters are each a perfect smaller version of their parents. 'Hum, huh, hum,' we both softly and repeatedly sing as we move closer to the pups with wide angle lenses. This is the special call we've been taught to use by the volunteer field assistant who tracked down the group for us. It reassures them that our presence is not a threat. 11 A Each one carries on scanning their surroundings, and getting in each other's way, as they would do every other morning.

The animals that live here have been studied over many years as part of a major, long-running, research study known as the Kalahari Meerkat Project. 12 D Meerkats are ideal candidates for researchers to study because they are active by day and live in quite open terrain in the Kalahari.

The animals have got used to having humans around and their behaviour remains unchanged around the researchers. 13 — This lack of attention to humans extends beyond the researchers to people like us and the TV crew. Sadly our time with these charming creatures is at an end, but tomorrow, and the day after that, the project will go on just as before. They will continue to be weighed, watched and worried over. And on TV, the world's most famous meerkats will simply go about their uniquely fascinating lives as if nothing whatsoever out of the ordinary was going on around them...

A. At first we feel silly, and more than a little self-conscious, but it seems to work since the animals stay calm as we approach them.

B. We realise he has seen us and is checking us out before emerging fully.

C. This is because they are most active early in the morning and in the late afternoon.

D. Without it, it would not have been possible to make the TV programmes which had brought us here.

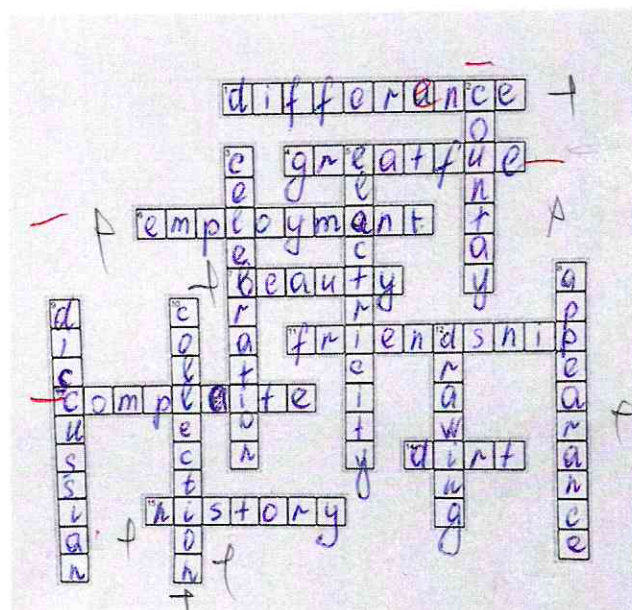

E. They are therefore able to spend hours in the field each day collecting important information without affecting the animals' routine.

F. This makes us both jump and distracts our attention from why we are here.

G. We had timed our visit with this possibility in mind but we still couldn't believe our luck.

H. This was because a series of seemingly endless, ear-splitting Kalahari thunderstorms resulted in a no-show of our subjects.

Task 1

You are going to read a magazine article about some animals which appeared in a TV documentary. Seven sentences have been removed from the article. Choose from the sentences A-H the one which fits each gap (7-13). There is one extra sentence which you do not need to use.

Meerkats are animals which are about 30 cm tall and live in groups of 20 to 30. The ones we were looking for were filmed during a period of four years and starred in a TV documentary series. We wanted to see them for real. +

So it's 5.30 am and we are in the middle of nowhere, waiting for the sun to burn off the remains of yesterday's storm clouds. Nearby, a large black bird lets rip his deafening, regular wake-up call. 7 F And while our eyes are off the ball, a meerkat makes his appearance. +

He pops his head out of the burrow where he has spent the night. 8 B Apparently satisfied, he stands upright. He is followed by a female and then some other adults. +

We arrived in extreme heat yesterday afternoon with great expectations, but this soon turned to disappointment. 9 H Today, however, we are finally metres away from some of the world's most charismatic wild creatures. Here are the homes of 14 meerkat groups who are the real-life, wildlife stars of an award-winning TV series. +

To our excitement, the adult meerkats are swiftly followed out of the burrow by four five-week-old pups. It's the summer breeding season so you would expect to see young. 10 G +

Unbelievably comical and cute, the youngsters are each a perfect smaller version of their parents. 'Hum, huh, hum,' we both softly and repeatedly sing as we move closer to the pups with wide angle lenses. This is the special call we've been taught to use by the volunteer field assistant who tracked down the group for us. It reassures them that our presence is not a threat. 11 A Each one carries on scanning their surroundings, and getting in each other's way, as they would do every other morning. +

The animals that live here have been studied over many years as part of a major, long-running, research study known as the Kalahari Meerkat Project. 12 D Meerkats are ideal candidates for researchers to study because they are active by day and live in quite open terrain in the Kalahari. +

The animals have got used to having humans around and their behaviour remains unchanged around the researchers. 13 E This lack of attention to humans extends beyond the researchers to people like us and the TV crew. Sadly our time with these charming creatures is at an end, but tomorrow, and the day after that, the project will go on just as before. They will continue to be weighed, watched and worried over. And on TV, the world's most famous meerkats will simply go about their uniquely fascinating lives as if nothing whatsoever out of the ordinary was going on around them... +

B. We realise he has seen us and is checking us out before emerging fully.

C. This is because they are most active early in the morning and in the late afternoon.
